

Google Cloud Risk Protection Program

A new relationship with Google Cloud, Chubb and other leading markets, brings an innovative approach to streamline the cyber insurance experience for clients and broker partners of all sizes.

As the cyber insurance underwriting data ecosystem continues to evolve, we are empowering our agents, brokers, and policyholders to have a more agile and efficient method for data sharing. Through the **Google Cloud Risk Protection Program**, Google Cloud customers can access a specially designed cyber insurance product that integrates a technology-driven data enablement process with Chubb's underwriting expertise.

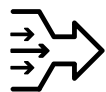

Through the Google Cloud Risk Protection Program, customers will receive an industry-leading cyber insurance program:

Specialized terms tailored for Google Cloud customers, including affirmative AI and quantum exploit insurance coverage to meet unique needs.

Reduces customer friction through a modern underwriting process and access to better underwriting data

Enables customized pricing for Google Cloud customers based on use and risk posture

How it Works

1

Broker identifies a Google Cloud customer and sends program instructions.

2

Customer enables tool to demonstrate security posture, remediates findings, and sends report to Chubb via platform.

3

Chubb streamlines underwriting and issues quote/policy, inclusive of broader coverage via Google Endorsement.
